Good Afternoon:

I am very disappointed at what the Michigan Supreme Court is trying to do. I also want to voice my outrage at what we have been seeing in the news. How the Courts are overstepping their jurisdiction, and trying to make law.

I agree with Johnny L. Fouse and many others. The Michigan Constitution as well as the United States Constitution makes it clear that judges are not to make the law but rather interpret the law. Why is the Michigan Supreme Court even considering taking the rights of citizens to have a trial by jury in any case? It is not humane. My husband is affected by asbestos exposure and now he has to have oxygen 24 hours a day. He was not told by his employer that this stuff was dangerous when he was working with it.

Now because of the companies' bad judgment, many people beside my husband are suffering. These people have every "right" to sue and go to trial if "they chose" to, not the corporations or the courts.

I hope you reconsider what you are trying to do and be more concerned about the employee that were affected by asbestos than the employer.
